

## MS1500 Touch Screen CNC Station

The MS1500 Touch Screen CNC Station brings a complete solution computer platform with pre-installed motion card & digital I/O to markets needing a compact, sealed, low powered computer that supports applications running CNC for Windows. The unit is fanless so it can be cooled while being sealed, allowing high performance without introducing contamination from cooling air brought into the unit.

The energy efficient, compact computer with an integrated Touch Screen is well suited for supporting user-machine interfaces for a broad array of applications.

### Features:

- For mills, lathes, routers, plasmas, lasers, water jets, punch, grinders & EDMs
- 15 Inch 1024x 768 TFT resistive Touch Screen
- Industry standard pre-installed/pre-tested Windows OS
- Fanless, sealed from harsh environments
- Networkable with optional external CDROM
- CNC Lite, Plus or Professional versions available
- Industry standard VESA mounting plate
- Flush flat panel mountable option for existing enclosures
- Prices based on several axis, I/O, software, amp drives & power supply configurations
